Invitation / Registration / Agenda

SPRING ALTERNATIVE SUMMIT *For Another Europe of Knowledge* THURSDAY 25 MARCH 2010 EUROPEAN PARLIAMENT

Wiertz Street/Wiertzstraat 60 B-1047 Brussels

Room 7C050

10:00-12:30 AM / 2:00-6:00 PM (Arrival from 9:00 AM)

On 25-26 March 2010, the Spring Summit of the Heads of State and Government of the European Union will mark the 10 years of the Lisbon Strategy, which frames the policies currently conducted in the Member States so as to 'modernise' the national research and education system (primary, secondary and higher education, lifelong learning). The Council will present an assessment of this Strategy and then project it over the next decade, complying with the agenda "Europe 2020" prepared by the European Commission (see http://ec.europa.eu/eu2020/index_fr.htm)

The declared ambition of a 'knowledge-based society' should be encouraged when its objective is to promote education and research as public goods, when it ensures that knowledge is available to all, and when it allows citizens to express a reasoned critical analysis of the scientific and technical choices which are proposed to them.

But the current orientation is different, and reduces this prospect to the creation of a 'knowledge market' whose harmful influence can be seen everywhere. Scientific and institutional independence is weakened. The public research system is being dismantled and the grip of business tightened. Tuition fees are increased. Studying and working conditions are becoming increasingly precarious and citizens are pushed aside from the technical and scientific decisions that affect their lives. Instead of being met, the promise of a 3% of G.D.P investment in research ends up with dire budget cuts.

In the past few years, large-scale mobilizations of increasing intensity have been initiated by students, workers in education and research, and by social movements in general, all around Europe. These protests strongly express a demand for a public education and research sector which will not surrender to competitive market forces nor be driven by the utilitarian views imposed by short-sighted policy-makers.

That is why we are organizing an Alternative Summit on 25 March 2010 in the European Parliament in Brussels

You are warmly invited to participate actively in this day of exchanges and debates
to build together another project

AGAINST the marketization of scientific and educative activities,
AGAINST the reduction of knowledge to technological innovation
and mere adaptation to the labour market,

FOR an emancipatory and democratic service in the field of Higher Education and Research
